

Alasdair Revie AIIRSM RSP PIEMA CBIFM

Alasdair Revie has over 20 years' experience in the successful delivery of site investigation projects, construction materials testing, materials trials, production of material specifications and the execution of quality control testing regimes. He has been Project Manager on a significant number of small to medium scale geotechnical and geo-environmental projects throughout the UK and abroad with responsibility for planning, logistics, technical execution and HSE compliance. As the HSEQ Manager, Alasdair is currently responsible for all aspects of Health, Safety, Environmental and Quality compliance within the Organisation.

As a former Quality Manager of a public sector UKAS accredited testing facility he has first-hand experience of the machinations of a busy testing environment; ensuring the maintenance of high standards of quality, procedure and compliance within an ISO/IEC 17025 accredited construction materials testing laboratory.

As a Recognised Safety and Environmental Practitioner with a Geotechnical background, Alasdair is familiar with all aspects of HSE compliance applicable to the Organisation's core business.

Alasdair is also an accomplished trainer and has taken responsibility for overseeing the Organisation's training needs analysis, identification of areas for training development and co-ordination of the delivery of both internal and externally sourced training. He is currently certified to tutor Conflict Management, Physical Intervention, Manual Handling and Abrasive Wheels.
